

SHIVAM GUPTA

SOFTWARE ENGINEER

Summary

Dynamic Software Engineer with **4 years of experience** in designing, developing, and deploying **scalable software solutions** using **Python**, with proficiency in frameworks like **Django** and **Flask**, and libraries such as **Pandas**, **NumPy**, and **TensorFlow** for building **robust, data-driven applications**. Demonstrates **expertise in RESTful API development** to enable **seamless system integration** and **scalable architectures** while leveraging methodologies like **Agile**, **SDLC**, and **Waterfall** for efficient project execution. Adept at creating **intuitive frontend interfaces** with **React.js** and **Vue.js** for **user-centric experiences**, and proficient in **Node.js** for **real-time, event-driven backend development**. Skilled in **data visualization** using **Tableau** and **Power BI** to deliver **actionable insights** and drive **strategic decision-making**. Experienced with **cloud platforms** including **AWS**, **Azure**, and **GCP** to optimize **application performance** and **scalability**, alongside strong expertise in **version control systems** like **Git** and **GitHub**, having contributed to **12+ projects** to foster **efficient team collaboration**.

Work History

SOFTWARE ENGINEER

Humana, USA

| Sep 2023 – Present

Implemented Agile methodologies across **7+ projects**, achieving a **25% boost in team productivity** and ensuring **98% on-time project delivery** through effective sprint planning and collaboration.

Designed and maintained scalable web applications using **Python**, **Django**, and **SQL**, enhancing data processing efficiency and reducing **query execution time by 30%** through optimized data workflows.

Developed real-time data streaming functionalities with **Node.js** and **WebSockets**, integrated into **React.js** applications, delivering **live updates** and significantly improving **application interactivity**.

Deployed Tableau dashboards and containerized applications on **DataBricks** using **Kubernetes**, resulting in a **40% enhancement in decision-making capabilities** and maintaining **99.9% uptime** for critical data-driven operations.

Engineered RESTful APIs and connected front-end components with **HTML5**, **CSS3**, and **JSON**, driving a **35% improvement in application functionality** and user experience by ensuring seamless integration.

Optimized database performance for **MySQL** and **PostgreSQL**, increasing **data retrieval and storage efficiency by 30%**, which enhanced performance for high-priority applications handling large-scale datasets.

SOFTWARE ENGINEER

Streebo Inc, India

| Mar 2020 – Jul 2022

Adopted Waterfall methodologies in software development, ensuring **structured project execution** with **100% compliance to project timelines** and precise documentation of each phase.

Designed and deployed web applications using **Python**, **Flask**, and **SQL**, reducing development cycles by **25%** through optimized coding practices and effective utilization of IDEs like **VS Code** and **IntelliJ IDEA**.

Developed RESTful APIs leveraging **JavaScript** and **AJAX**, leading to a **30% improvement in application response times** and overall performance optimization.

Implemented machine learning models with **NumPy**, **TensorFlow**, and **PyTorch**, achieving a **20% increase in prediction accuracy** for data-driven initiatives, streamlining analytical capabilities.

Architected and integrated RESTful APIs using **Node.js** and **Express.js**, ensuring seamless communication between front-end and back-end systems while reducing **API response latency by 30%**.

Created dynamic Power BI dashboards, translating complex datasets into actionable insights, resulting in a **40% improvement in business decision-making processes**.

Deployed scalable cloud solutions utilizing **AWS services**, ensuring **99% uptime** across critical applications and enhancing system reliability and availability.

Containerized applications with Docker, improving resource utilization consistency and minimizing **environment-related deployment issues** for streamlined development workflows.

Skills

Methodologies:

SDLC, Agile/Scrum, Waterfall

Programming Languages:

Python, Java, SQL

Databases:

MySQL, PostgreSQL, SQLite,

MongoDB

Frameworks & Packages:

Django, Flask, Pandas, NumPy,

Matplotlib, Seaborn, Plotly,

TensorFlow, Scikit-learn, PyTorch

CI/CD & Version Control:

Jenkins, Docker, Kubernetes, Git,

GitHub, GitLab, Bitbucket

Clouds:

AWS (EC2, S3, ECS, Lambdas,

SageMaker, Elasticsearch, RDS,

ELB, SQS, IAM, EBS, CloudWatch,

CloudFormation), Azure

Web Development:

HTML5, CSS3, JavaScript, RESTful

APIs, JSON, AJAX, React.js,

Node.js, Express.js

IDEs:

PyCharm, VS Code, Jupyter

Notebook, IntelliJ IDEA

Operating Systems:

Windows, Linux

Education

M.S.; Computer Science

Illinois Institute of Technology,

Illinois, USA

May 2024

B.Tech; Computer Science & Engineering

Parul University, IND

Jul 2020
